Basically, I build things, troubleshoot things, automate things, and occasionally wonder why the thing worked yesterday. IT graduate turned Product Development person. Somehow, it works??

EXPERIENCES

The Brink's Company

Product Development Specialist

Jakarta, Indonesia

October 2025 - Present

- Contributed to the development and enhancement of Cash Deposit Machine (CDM) products by implementing new features, improving system reliability, and resolving software issues.
- Collaborated with software, hardware, and business teams to ensure product readiness from development through deployment.
- Led User Acceptance Testing (UAT) to validate new features and ensure alignment with business and user requirements.

Bank Negara Indonesia

System Development Intern

Jakarta, Indonesia

September 2024 - December 2024

- Developed internal digital solutions, including a Streamlit dashboard and AI chatbot, to improve employee access to operational data and company policies.
- Worked with stakeholders to translate business needs into practical digital tools that improved operational efficiency.

Jakarta Smart City

Android Developer Intern

Jakarta, Indonesia

July 2024 - August 2024

- Analyzed the JAKI application flow and created a flowchart illustrating user interaction, report submission, and internal handling processes.
- Created a digital transformation solution by converting a web-based system into a mobile application.

Himpunan Mahasiswa Teknologi Informasi ITS (HMIT ITS)

Head of Media and Information

Surabaya, Indonesia

March 2024 - Feb 2025

- Led a team in managing social media strategy and organizational branding through structured content planning and visual communication design.
- Ensured timely and accurate information delivery to internal and external stakeholders, improving communication effectiveness and engagement.

PROJECTS

please look at this one, I'm really proud of this project!

Real-time Violence and Weapon Detection System, IEEE Publication

November 2025

- Developed an Edge AI-based computer vision system for real-time violence and weapon detection in public indoor environments
- Published the project as an IEEE conference paper titled "Real-Time Violence and Weapon Detection in Public Indoor Spaces Using Edge-Powered Computer Vision".

ADDITIONAL EXPERIENCE

- Teaching Assistant, Sepuluh Nopember Institute of Technology** - Assisted in teaching Mobile Development and Data Structures, mentoring undergraduate students through lectures, coding exercises, and practical sessions.
- IoT Instructor (Community Service - KKN), Sepuluh Nopember Institute of Technology** - Trained 50 middle and high school teachers on IoT-based STEM education using ESP32 and PictoBlox.
