

WIRIDLANGIT SULUH JIWANGGA

wiridlangit@gmail.com | Jakarta, Indonesia | +628567870225 | linkedin.com/in/wiridlangit | jiwangga.com

Information Technology (IT) graduate with experience in AI, IoT, and system development. Skilled in automation development, software troubleshooting, leading User Acceptance Testing (UAT) and System Integration Testing (SIT), and cross-functional collaboration teams to deliver reliable products. Passionate about building scalable, user-centered technology products.

EDUCATION

Sepuluh Nopember Institute of Technology <i>Bachelor of Computer Science GPA: 3.74 / 4.00</i>	Surabaya, Indonesia <i>September 2021 - September 2025</i>
Bangkit Academy led by Google, GoTo, & Traveloka <i>Mobile Development Cohort</i>	Indonesia <i>February 2024 - July 2024</i>

SKILLS

Programming: JavaScript, C/C++, Python, Kotlin
Tools: Linux, Bash Script, Git, Docker, Figma
AI/IoT: YOLO, Raspberry Pi, ESP32, Hailo AI Kit
Certifications: PSPO I | CIoTP | Android Development (Dicoding)
Languages: Indonesian (Native) | English (Advanced)

WORK EXPERIENCES

The Brink's Company <i>Product Development Specialist</i>	Jakarta, Indonesia <i>October 2025 - Present</i>
- Developed Bash automation scripts in Linux environments to automate the staging workflows, including machine configuration and software setup. - Conducted CDM product development with bank clients, including process flow design, SIT/UAT execution, troubleshooting, and technical documentation. - Diagnosed and repaired 10+ STM32-based I/O boards, restoring board functionality and reducing the need for costly hardware replacement.	
Bank Negara Indonesia <i>System Development Intern</i>	Jakarta, Indonesia <i>September 2024 - December 2024</i>
- Developed internal digital solutions, including a Streamlit dashboard and AI chatbot, to improve employee access to operational data and company policies. - Analyzed user and business requirements and translated them into functional solutions in collaboration with stakeholders.	
Jakarta Smart City <i>Android Developer Intern</i>	Jakarta, Indonesia <i>July 2024 - August 2024</i>
- Analyzed the JAKI application workflow and designed system flowcharts to map user interactions, report submission, and internal processing. - Developed an Android mobile application using Kotlin, transforming an existing web-based system into a mobile platform.	

PROJECTS

Real-time Violence and Weapon Detection System, IEEE Publication	<i>November 2025</i>
- Developed an Edge AI-based computer vision system for real-time violence and weapon detection in public indoor environments - Published the project as an IEEE conference paper titled "Real-Time Violence and Weapon Detection in Public Indoor Spaces Using Edge-Powered Computer Vision".	

ADDITIONAL EXPERIENCE

Teaching Assistant, Sepuluh Nopember Institute of Technology - Assisted in teaching Mobile Development and Data Structures, mentoring undergraduate students through lectures, coding exercises, and practical sessions. IoT Instructor (Community Service - KKN), Sepuluh Nopember Institute of Technology - Trained 50 middle and high school teachers in Blitar on IoT-based STEM education using ESP32 and PictoBlox.
